The National Awareness Campaign to register on the Coronavirus Vaccine Platform

Does the COVID-19 vaccine provide protection against the New Delta Variant?

Studies show that in countries where the variant is spread, unvaccinated populations are more likely to be hospitalized after infection. **Two doses of the vaccine should be administered to provide protection from the Delta Variant.**

MINISTRY OF HEALTH
UKRAINE

STATE AGENCY FOR PUBLIC ADMINISTRATION REFORM AND ANTI-CORRUPTION COOPERATION OF UKRAINE

UNICEF
United Nations Children's Fund

UN WOMEN
United Nations Entity for Gender Equality and the Empowerment of Women

What is the Delta Variant?

It is a variant of the COVID-19 virus and the fastest spreading one.

Till 9 July 2021, it has been found in 98 countries at least and is spreading rapidly among unvaccinated populations.

The infographic features a blue background with three red coronavirus particles in the top right corner. At the bottom, there is a row of logos for partner organizations: a yellow oil lamp, the Ministry of Culture and Heritage of Israel, the Ministry of Health, the Ministry of Education, the Ministry of Health, UNICEF, and the Ministry of Health.

How can we protect ourselves from the Delta Variant?

Take the full course of vaccination to achieve full protection.

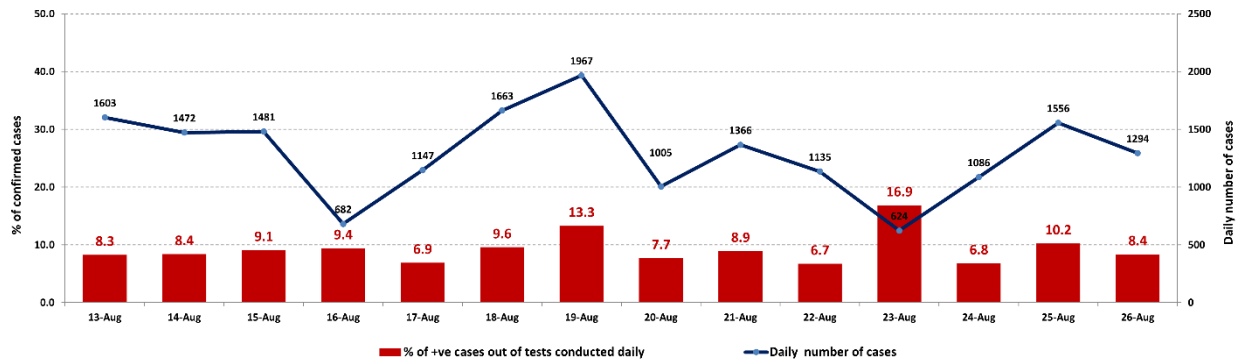

Abide by all preventive measures (safe distancing, mask wearing, hand hygiene)

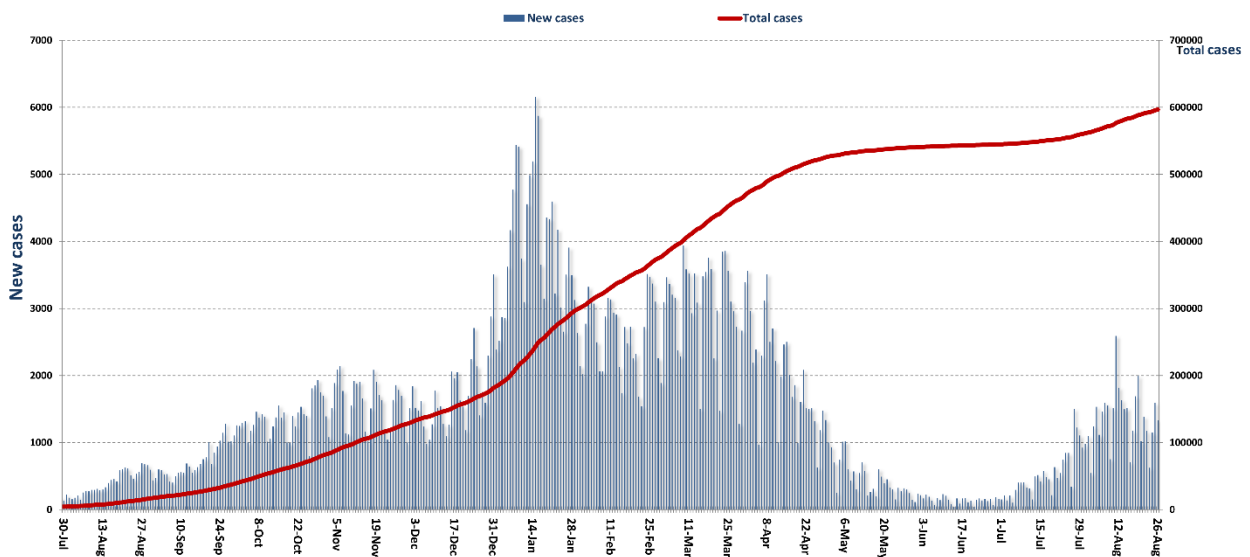

The infographic features a blue background with red icons. At the top right, three red virus particles are shown, one of which is labeled 'Delta Variant'. Below them, a large red circle contains two white syringes. To the right of this, a red circle shows two people wearing masks with a '1.5m' distance marker between them. Below that, another red circle shows hands being washed under a faucet. At the bottom, there is a row of logos: a glass of water, the 'REPUBLIC OF UGANDA MINISTRY OF PUBLIC HEALTH' logo, a '100% UGANDA' logo, the 'Uganda Health Regulatory Authority' logo, the 'unicef' logo, and a 'WASH' logo.
