Decisions and actions taken – 03/04/2021

Ministry of Public Health

The Ministry of Public Health announced in a statement that to facilitate the access of citizens, who suffer from special medical conditions to the vaccine, they are required to follow the following steps:

- First: Register via the electronic platform moph.covax.gov.lb
- Second: Contacting the vaccination hotline 1214, or sending the medical report with medicines and laboratory tests that prove the case (report or old prescription), a copy of the ID, the phone number that was registered on the electronic platform to one of the two e-mails:
covid19vacc1214@gmail.com , moph1214@gmail.com
- Third: A medical committee studies the submitted requests, and when they meet the required conditions, the response period ranges between one day and one week from the date of sending the documents mentioned in the second clause, where the citizen will receive a message on the phone number registered on the platform to choose the date of vaccination.

The Ministry of Public Health stated that the approved certificate for those who received two doses of the vaccine through the ministry is the electronic certificate that contains the bar code and issued on the data page of the concerned person on the electronic platform and does not need a signature or stamp from the ministry.

The Ministry of Public Health has reminded of the decision issued by the Minister of Public Health regarding the issuance of an official vaccination document for the vaccinated from outside the national electronic platform, those who received the first dose outside Lebanon and brought the second dose of the vaccine with them in better conditions, or who received vaccines through special initiatives, as it states The decision is on the necessity for these people to undergo an IgG immunoassay two weeks after completing the second dose of the vaccine and obtain an official document from a laboratory accredited on or outside the Lebanese territory proving the result of this examination. They also have to present a medical report on a standardized prescription, signed and stamped with the seal of a doctor registered in one of the The two Syndicates of Doctors in Lebanon, based on these documents, the Preventive Medicine Department at the Ministry of Public Health issues an official document certifying the validity of the person concerned's vaccination.

The Minister of Public Health pointed out that positive indicators have started to emerge for the national vaccination campaign by recording a decline in the mortality rate among the target groups, and that the plan depends on the ability of the World Health Organization, the Kovacs platform and the companies producing vaccines to adhere to their obligations towards the countries that they classify from the third world, so that shipments arrive Lebanon booked early.

The Ministry of Public Health announced the completion of PCR checks for flights that arrived in Beirut, and were conducted at the airport on March 30 and 31 and April 1, 2021; The results showed that there were fifty-six (56) positive cases, and they were distributed over the following flights:
