-The Ministry of Public Health clarified that the daily information issued by the Ministry on the numbers of cases in the various Lebanese regions is based on what the Ministry receives from the results it receives from the laboratories in the various Lebanese regions, as it was found that these laboratories depend in some cases on the place of work and not the place of residence when registering the information. Accordingly, it was confirmed, through communication with the Syndicate of Laboratory Owners, that the laboratories should report the place of residence of those conducting the examination and not the place of work.
