Decisions and actions taken – 11/24/2020

Ministry of Public Health

- Within the context of the Ministry of Public Health's plan to increase the number of intensive care beds in Corona departments in governmental hospitals in various Lebanese regions, the Minister of Public Health conducted a field inspection in both Hasbaya Governmental Hospital and Rashaya Governmental Hospital to keep up with their provision of special sections for new Corona cases.
- The Minister of Public Health announced that after nine days of the full closure, the percentage of positive examinations is still high and reaches 15%. However, the stability of this rate gives a good indication especially that the real evaluation of the closure begins in the second week. He also announced that the ministry's goal is to reduce the positivity rate to 10%, coinciding with raising the readiness of governmental and private hospitals by increasing the intensive care beds.
- The examinations conducted by the Ministry of Public Health teams in various Lebanese regions during recent days showed the existence of epidemic clusters in Baalbek Hermel, Akkar and Ghobeiry, and this is an indication that the expats arriving from abroad or those who have recently traveled have transmitted the infection to their family members. Their duty is to quarantine for at least ten days, even if the PCR test is negative.
- Since Sunday, 11/22/2020, the Ministry of Public Health began conducting Rapid Antigen examinations for those who complain of symptoms, which are accurate examinations whose results are issued after a third of an hour and help determine the type of infection if it is Corona or influenza. The Ministry is in the process of conducting random PCR examinations this week to assess the epidemiological reality in the community.
- The Minister of Public Health announced that the Ministry is continuing to implement its plan to increase the number of intensive care beds in governmental hospitals in various Lebanese regions, to reach the total number of 266 beds, and stressed on the importance of the cooperation of private hospitals, so that 4 to 6 intensive care beds are prepared in 50 hospitals.
- The Minister of Public Health announced that Lebanon will receive the "Pfizer" vaccine during February 2021 if it is finally approved by international health authorities, as the quantity will cover 15% of the Lebanese, in addition to 20% that will be covered through the Kovacs global vaccination platform.
- The results showed that there were (5) positive cases distributed over the following flights:

Date	Company	Country	Flight Number	Number of Cases
