Ministry of Public Health

The Ministry of Public Health announced that the health situation in Lebanon has become at the height of the second phase of the outbreak of the epidemic, as the occupancy rate of intensive care beds has reached about 70%, noting that the Ministry has started the phase of preparing more intensive care beds in government hospitals.

- The Ministry of Public Health, in its general meeting to assess the epidemiological situation in Lebanon, identified the challenges that hinder achieving control of the spread of the epidemic, the most important of which are:
- The rate of infection in Lebanon is one hundred twenty (120) per 100,000 people per week, and this percentage is considered the peak in the registration of injuries.
- The mortality rate has reached its peak in recent times, at one-point-two percent (1.2%).
- The ability to achieve success in implementing the decision to close the towns and villages in which the epidemic is spreading, which is considered the last opportunity for Lebanon to confront the epidemic.
- The implementation of a plan to raise the level of preparedness of hospitals that were greatly affected by the disaster of the Beirut Port explosion.

The Ministry of Public Health reported that PCR tests were completed for flights that arrived in Beirut and were conducted at the airport on 10/2/2020, in addition to the first batch of flight checks that arrived in Beirut on 10/3/2020, where fifteen (15) positive cases were recorded. New ones distributed over the following trips:
